

GreenLeaf Energy - Company Overview and Sustainability Report

GreenLeaf Energy was founded in 2015 and is headquartered in Austin, Texas.

As of 2024 the company employs 320 people and reported annual revenue of 85 million US dollars.

GreenLeaf's mission is to make affordable clean energy accessible to every household.

Since 2020 the company has reduced its manufacturing carbon footprint by 40 percent.

GreenLeaf recycles 95 percent of its manufacturing waste.

The company now sells its products in 12 countries across three continents.

For comparison, 2023 figures were lower: GreenLeaf employed 280 people and reported 62 million US dollars of revenue. Do not cite 2023 headcount or 2023 revenue when a question asks for the latest reported year.

A European commercial office opened in Berlin in 2022. Berlin is a sales office only. Corporate headquarters remain in Austin, Texas. Manufacturing is in Monterrey, Mexico. None of those sites replace Austin as the headquarters city.

The board meets quarterly in Austin. Investor relations publishes the 2024 headcount and revenue in this overview; press mentions of the Berlin office do not change the legal domicile.
